

NANDHA KUMAR C

Full Stack Developer (MERN)

6380229619 | nandhakumarchinnasami@gmail.com | LinkedIn | GitHub | Portfolio | Erode, Tamil Nadu

SUMMARY

Full Stack MERN Developer with 2.6+ years of experience delivering scalable SaaS and healthcare applications. Proficient in React.js, TypeScript, Node.js, Express.js, and MongoDB with hands-on experience in JWT auth, RBAC, Stripe payments, OCR integrations, i18n, HTML-to-PDF generation, CI/CD pipelines, and HIPAA-compliant workflows. Skilled at translating Figma designs into production-ready, cross-browser UIs with a focus on performance optimization and clean code.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, React Query, Context API, Redux, React Router, Axios, Tailwind CSS, Material UI, Bootstrap

Backend: Node.js, Express.js, REST API Development, JWT Authentication

Database: MongoDB, CRUD Operations, Data Modeling

DevOps / CI-CD: GitHub Actions, GitHub Pages, CI/CD Pipelines, Environment Variables, Branch Protection

Tools: Git, GitHub, Postman, Vite, Webpack, ESLint, Prettier, Figma

Concepts: RBAC, CORS, HIPAA Compliance, i18n, Stripe Integration, OCR Integration, Responsive Design, Agile/Scrum

EXPERIENCE

Program Analyst | Siddha AI, Salem

Apr 2024 – Present

- Shipped 4 HIPAA-compliant healthcare SaaS features — patient intake, Stripe payment flows, OCR scanning, and multilingual forms (EN/ES/ZH/AR/FR/DE) — serving 1,000+ US healthcare users.
- Built multi-tenant Admin & Super Admin dashboards with RBAC and JWT auth, including HTML-to-PDF agreement generation and real-time revenue analytics.
- Reduced redundant API requests by 45%, improving page load time by 35% using React Query caching, lazy loading, and code splitting, eliminating redundant API calls across complex multi-step workflows.
- Configured GitHub Actions CI/CD pipeline — automated build, test, and deployment workflows with environment-based secrets management and branch protection.
- Translated Figma designs into pixel-perfect, cross-browser UIs compatible across Chrome, Firefox, Safari, and Edge.
- Collaborated in Agile/Scrum sprints and maintained code quality using ESLint and Prettier standards.

Programmer Analyst Trainee | Siddha AI, Salem

Dec 2023 – Mar 2024

- Built reusable React.js components for patient intake multi-step forms, managing complex state across 8+ form steps using Context API — promoted to Program Analyst within 4 months.
- Integrated OCR-based document scanning UI with manual fallback entry and REST APIs with JWT authentication.
- Contributed to ESLint/Prettier setup and participated in Agile sprint planning under senior developer guidance.

Full Stack Developer | Freelance (Self-employed), Erode

Jul 2023 – Aug 2023

- Sole developer — built a complete 7-module MERN employee onboarding platform for SAN Institute from Figma wireframe to Vercel deployment, cutting HR onboarding time by 50%.
- Built RESTful APIs using Node.js and Express.js, configured CORS middleware, integrated frontend using Axios, implemented MongoDB CRUD operations, and automated email notifications.

PROJECTS

Patient Form & Agreement System — React.js, TypeScript, Tailwind CSS, OCR, i18n, REST APIs [Healthcare SaaS · HIPAA]

- Built HIPAA-compliant multilingual patient intake UI (EN/ES/HI) with multi-step form state managed via Context API across 8+ components - used by 1,000+ US healthcare users.
- Integrated OCR document scanning for auto data extraction from ID documents; built fallback manual entry UI for OCR failures ensuring uninterrupted onboarding.
- Implemented PDF agreement generation with digital signature support and appointment booking with pre/post-payment Stripe flows.

Admin & Super Admin Dashboard — *React.js, TypeScript, Tailwind CSS, React Query, Stripe, i18n*

- Built multi-tenant SaaS dashboard for two role levels — Super Admin (platform-level) and Admin (client-level) — with RBAC-based conditional rendering.
- Implemented dynamic HTML-to-PDF agreement generation, real-time revenue analytics, and helpdesk ticket system with file upload and Stripe billing.
- Optimized API performance with React Query caching; added i18n multilingual support across the full dashboard.

Client Intake & Payment Flow — *React.js, TypeScript, Tailwind CSS, Stripe, i18n*

- Developed responsive client onboarding UI with integrated Stripe payment flow, agreement signing step, and multilingual i18n support.
- Implemented payment success/failure UI states and ensured cross-browser compatibility across all major browsers.

Employee Joining Form System — *MongoDB, Express.js, React.js, Node.js, GitHub Actions, Figma* **[Freelance · Full Stack]**

- Sole developer — designed UI in Figma, built full-stack MERN app covering 7 modules (personal info, employment history, education, skills, references, emergency contacts, payroll).
- Configured GitHub Actions CI/CD pipeline for automated build and deployment to GitHub Pages on every push to main — with environment-based secrets and branch protection rules.
- Integrated MongoDB CRUD, client/server-side validation, and automated email notifications — reducing HR onboarding time by 50%.

EDUCATION

B.E. Computer Science and Engineering

2016 – 2020

Nandha College of Technology, Erode | Anna University
