SUMMARY

MERN Stack Developer with 2.8+ years of experience building and delivering production web applications using React.js, TypeScript, Node.js, Express.js, and MongoDB. Independently built and delivered 5 client-facing and administrative healthcare SaaS applications, and separately developed a 7-module MERN employee onboarding platform end-to-end, including REST API development, MongoDB CRUD operations, validation, CORS, automated email notifications, and CI/CD deployment. Hands-on experience with JWT authentication, RBAC, Stripe payment integration, OCR, REST API integration, and responsive UI development. Strong ability to build maintainable full-stack features across React.js frontend, Node.js/Express.js backend, and MongoDB data operations.

TECHNICAL SKILLS

MERN Stack: MongoDB, Express.js, React.js, Node.js

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, React Query, Redux, Context API, React Router, Axios, Tailwind CSS, Material UI, Bootstrap

Backend: Node.js, Express.js, REST API Development, Middleware, JWT Authentication, RBAC, CORS, CRUD Operations

Database: MongoDB, Schema Design, CRUD Operations, Data Validation

Integrations: Stripe, OCR, HTML-to-PDF Generation, Automated Email Notifications, Token-Based Workflows

UI Engineering: Responsive Design, Cross-Browser Compatibility, Reusable Components, Dynamic Forms, Multilingual UI (i18n), Figma-to-Code

Technical SEO: SEO Implementation, Meta Tags, Google Search Console, React Helmet Async

Testing: Jest, React Testing Library, Manual UI & Cross-Browser Testing

DevOps & Tools: Git, GitHub, GitHub Actions (CI/CD), Vite, Webpack, Postman, ESLint, Prettier

Methodologies: Agile, Scrum

EXPERIENCE

Program Analyst — Frontend-focused

Dec 2023 – Aug 2026

Siddha AI

Salem, Tamil Nadu

- Independently built and delivered 5 production React.js/TypeScript applications end-to-end for healthcare SaaS workflows – Super Admin Dashboard, Client Intake, Patient Intake & Prepayment, Post-Payment, and Admin Dashboard.
- Integrated REST APIs using Axios, React Query, and Context API to power API-driven forms, conditional workflows, authentication states, and role-based interfaces.
- Worked with JWT-based authentication and RBAC concepts to support protected workflows and role-specific dashboard views.
- Integrated Stripe payment workflows, OCR document scanning, digital signatures, and HTML-to-PDF generation into live production systems used by 1,000+ US healthcare users.
- Built multilingual interfaces supporting English, Spanish, Chinese, Arabic, French, and German.
- Improved application performance using React Query caching, lazy loading, code splitting, and component memoization.
- Translated Figma designs into pixel-accurate, responsive interfaces and validated across Chrome, Firefox, Safari, and Edge.
- Set up GitHub Actions CI/CD pipelines for automated build, test, and deployment, with environment-based secrets and branch protection.

Freelance Full Stack Developer

Jul 2023 – Oct 2023

Self-employed

Erode, Tamil Nadu

- Sole developer on a 7-module MERN employee onboarding platform, delivered end-to-end from Figma wireframe through deployment on Vercel.
- Built modules covering personal information, employment history, education, skills, references, emergency contacts, and payroll.
- Developed RESTful APIs with Node.js and Express.js and integrated them with the React.js frontend via Axios.
- Implemented MongoDB CRUD operations, client- and server-side validation, CORS middleware, and automated email notifications.
- Configured GitHub Actions CI/CD for automated build and deployment, cutting HR onboarding time by 50%.

PROJECTS

Employee Joining Form System | *MongoDB, Express.js, React.js, Node.js, GitHub Actions*

- Designed and built a full-stack MERN onboarding application across 7 modules; reduced HR onboarding time by 50% versus the prior manual process.
- Built REST APIs in Node.js/Express.js with MongoDB CRUD operations, validation, CORS middleware, and automated email notifications.

Admin & Super Admin Dashboard | *React.js, TypeScript, Tailwind CSS, React Query, Stripe*

- Built multi-tenant dashboards for Super Admin and Admin roles with RBAC-based conditional rendering and a Help Desk ticket tracking interface.
- Implemented dynamic HTML-to-PDF agreement generation via Jodit Editor with variable substitution and watermarks, plus Stripe billing configuration.

Patient Intake & Prepayment | *React.js, TypeScript, Tailwind CSS, OCR*

- Built a token-based flow conditionally rendering Patient Intake or Prepayment screens based on API response, with digital signature capture and HTML-to-PDF generation.
- Integrated OCR to auto-extract patient information from scanned ID documents, with manual fallback entry.

Client Intake & Payment Flow | *React.js, TypeScript, Tailwind CSS, Stripe*

- Built a multi-step client onboarding flow covering subscription plans, agreement signing, Stripe account setup, and billing summary/payment.
- Designed a resume-progress feature using per-step completion flags so clients could resume exactly where they left off.

Post-Payment Billing | *React.js, TypeScript, Tailwind CSS, Stripe*

- Built a standalone token-based billing screen showing prepaid amount, insurance paid, and balance due, with Stripe success/failure payment states.

EDUCATION

Nandha College of Technology, Erode (Anna University)

Erode, Tamil Nadu

B.E. Computer Science and Engineering

2016 – 2020

LANGUAGE

English, Tamil
