Summary

MERN Stack Developer with 2.5+ years of experience building production healthcare SaaS applications with React.js, TypeScript, and Tailwind CSS. Strong in performant, accessible, multilingual user interfaces, with working backend experience in Node.js, Express.js, and MongoDB.

Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Context API, React Query, React Router, Axios, Tailwind CSS, Material UI

Backend: Node.js, Express.js, REST API Development, Middleware, JWT Authentication, RBAC, CORS

Database: MongoDB, Schema Design, CRUD Operations, Data Validation

UI Engineering: Responsive Design, Reusable Components, Dynamic Forms, Figma-to-Code, Cross-Browser Compatibility, Multilingual UI (i18n), Accessibility (Semantic HTML, ARIA)

Integrations: REST APIs, Stripe, OCR, HTML-to-PDF Generation, Digital Signatures

Tools: Vite, Git, GitHub, GitHub Actions (CI/CD), ESLint, Prettier

Methodologies: Agile/Scrum, Code Reviews

AI-Assisted Development: Claude, OpenAI Codex, Cursor

Languages (Spoken): English, Tamil

Experience

Frontend Developer Dec 2023 – Aug 2026

Siddha AI

- Built and contributed to 5 production React.js and TypeScript applications for client onboarding, patient intake, payments, and administration, supporting 1,000+ US healthcare users; owned Super Admin, Client Intake, Patient Intake & Prepayment, and Post-Payment applications end to end.
- Optimised application performance in the admin dashboards by introducing React Query caching, reducing unnecessary API calls, improving page responsiveness, and lowering backend load.
- Cut manual data entry in patient intake with OCR-based ID capture that auto-fills forms; streamlined payments and paperwork with Stripe, digital signatures, and HTML-to-PDF generation from Jodit Editor content.
- Maintained a production Next.js application, investigating and resolving reported bugs and shipping fixes to keep the platform stable for live users.
- Collaborated with the product manager and backend team on workflow diagrams and Figma-aligned screens, and kept releases stable through code reviews, QA fixes, and GitHub Actions CI/CD.

MERN Stack Developer (Freelance) Aug 2023 – Oct 2023

Self-employed

- Independently designed, built, and deployed a MERN employee onboarding platform from Figma wireframes to production on Vercel, with GitHub Actions deployment.

Projects

Employee Joining Form System | *MongoDB, Express.js, React.js, Node.js, Material UI*

- Built a seven-module onboarding platform covering personal information, employment history, education, skills, references, emergency contacts, and payroll.
- Built REST APIs with Node.js and Express.js, MongoDB CRUD operations, validation, CORS middleware, and automated email notifications; reduced HR onboarding time by 50% compared with the previous manual process.

Super Admin Dashboard | *React.js, TypeScript, Vite, Tailwind CSS, Context API*

- Built client onboarding, subscription management, trial/grace-period tracking, and account verification, plus agreement editing and a Help Desk ticketing interface.

Patient Intake & Prepayment | *React.js, TypeScript, Tailwind CSS, OCR, i18n, Stripe*

- Built token-driven, multilingual screens rendered dynamically from API responses, with signature retrieval and a prepayment flow for patients.

Education

Nandha College of Technology (Anna University) Erode, Tamil Nadu

B.E. Computer Science and Engineering *2016 – 2020*
